## ALABASTER PRODUCT ADVANTAGES

Below mentioned are few points which will make the product even more irresistible:

**Price:**

**KALON** is a pocket friendly product range, especially in comparison to Original Onyx / Alabaster stone and marble.

**KALON** is not a natural material, so it can be produced in large numbers resulting to economy of production which is later on passed to the consumer itself.

**Thermoformability:**

It can be molded to any form of your choice. The best to satisfy one's creative urge.

**Easy Fabrication:**

Skilled carpenters, tile setters, and glaziers can easily install KALON material using basic carpentry tools.

**Colour & Design**

More options available in terms of colours and designs as compared to natural stone and marble also specific colour can be manufactured according to customer requirement

**Nonporous:**

Being a nonporous material, it does not allow stains to make their way deep into the surface which makes it a stain resistant, easy to clean product.

**Scratch Resistant:**

Unlike other solid surfaces it can easily be renewed and repaired if scratched or chipped. If scratches appear after years, it can be renewed to new surface by buffing.

**Water-resistant**

No harm with warm and cold water

## ALABASTER PRODUCT PROPERTIES

S. NO	INSPECTED AREA	UNIT	STANDARD
1.	Density	g/cm <sup>2</sup>	≥1.2
2.	Hygroscopic Capacity	%≤	0.4
