# ABOUT

*From natural raw to uber modern patterns, Surya Click laminate flooring helps you to create your own personal living space. The new decor collection features beautiful designs with characterful swirls, subdued shafts, cracks, and knots to bring you the look of true-to-nature wood.*

Surya Click laminates bring radiance and versatility to work with any décor. The presentation of real hard wood is maintained through top quality fibers and resins, to provide high resistance and increased durability. The revolutionary click system is a good starting point to think about selecting the type of design to turn your rooms into country, modern, classical, or vintage style.

## Real Wood Impressions

Surya Click laminate floorings are barely distinguishable from the real wood in both look and feel. The highly detailed photographic properties simulate the colour, grain, and texture of the natural material and are often mistaken for the real wood.

## Outstanding Durability

Our promise comes from the remarkable strength of the materials fused together in a unique lamination process. Surya Click laminates feature protective layers that resist wearing, stains and fading and keep it away from scratches and dents.

## Easy Installation

Surya Click has the country's first 'click-lock' design that securely locks without nails or glue. The advanced system means a smart application of the flooring with minimal groove while saving installation time and sound absorption for a quieter environment.

## Beautiful Styles

Surya Click laminate flooring set the stage for your dream space. With a wide variety of curated, authentic wood designs and textures, it is an easy find for anyone wanting a beautiful home. There is something for everyone from modern looks to country style.

**5G technology**  
by  **Välinge**

## Innovation that saves your time.

Surya Click brings you the smartest flooring system for an easy installation. The 5G system, as referred, is an advanced locking system to install laminate floor planks with the 'Single Click' method.

The locking system has the conventional long side, but initiates on the short side by a simple folding down movement and provides a robust and glue free laminate flooring for all types and widths.

*'Saves 50% of your time on installation with no tools required to achieve the perfect balance'*

**Fast & Easy**  
single action installation

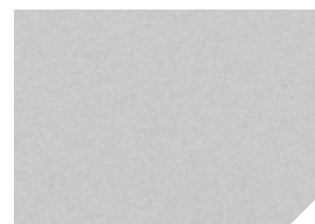

# EASY TO CLEAN

**5G** technology  
by  **Välinge**

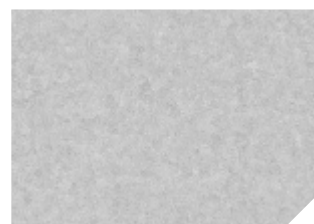

Välinge has the best-patented technology in flooring applications, and 5G is the latest addition to their extensive portfolio. Since 1993, they have been the center of the industry through licensing and share the knowledge and art to considerably improve the quality of flooring and the lives surrounding it.

The 5G locking system is the fastest and the easiest method to install laminate flooring. It saves 50% of time on installation as compared to other locking systems. And, Surya Click offers this innovative time and cost saving technology with a desirable collection of laminate designs.
